

L-REPPRO-BL – Lutron Wireless Repeater

The Lutron wireless repeater allows for the wireless range expansion of your Lutron lighting control system for whole house coverage. Lutron wireless repeaters extend the range of Radio Frequency (RF) signals that are sent between devices. Up to four wireless repeaters can be added to extend the RF range for larger system applications. Each wireless repeater has an RF range of 30 ft (9 m), covering an area of approximately 2500 ft² (232 m²).

Features

- Expands RF range
- Easily adds to an existing system through the Lutron App1 or system software
- Can add up to four Wireless Repeaters per system
- Works with RA2 Select and RadioRA 2 systems
